

## Senior Product Designer

- High end window and door systems design, testing and accreditation – 10 years +.
- Strong research & development, verification, and engineering to strict NATA standards.
- Mechanical Engineer experienced in designing, FEA analysis and engineering calculations.

Package: \$125k + Superannuation

Location: Sydney, New South Wales

Overview: A technically savvy engineering professional that has over 10 years proven experience designing, testing, and technically supporting high end residential and commercial window and door systems through a national distribution network.

With his product design experience, this Mechanical Engineer has been involved in the concept, design and launch of window systems including residential and commercial thermally broken framing systems, cyclonic glazing systems and commercial balustrading systems.

Degree qualified in Mechanical Engineering, coupled with a Diploma in Refrigeration Engineering, this professional has an intimate working knowledge of the Australian standards for glass & glazing, windows and doors and the BCA generally.

If you are looking for an engineering professional that is highly skilled in window and door systems design, testing and technical support, this person you must meet.
