**Leading international sealing and hardware supplier is looking for a research & development technician to assist with R&D projects and NATA Testing**

## Research & Development Technician

- Well established International Sealing and Hardware Supplier
- World class manufacturing operations.
- Design and supply a wide range of building products.

### **Our client**

An international market-leading company with a one-stop solution of hardware and sealing components for residential and commercial applications. Started centuries ago, their vision is to guarantee and add value in the field of windows, doors, curtain walls, sealing and hardware solutions.

### **What they offer**

Believing that reward should always match effort, they are offering the right person with passion and enthusiasm the following:

- Competitive base salary
- Superannuation
- Strong career progression

### **Your responsibility**

Based in Sydney and reporting to the Research & Development Manager, this role's primary purpose is to work in a laboratory setting, conducting tests to ensure that products are being tested correctly to BCA standards. You will also be in charge of gathering data, keeping accurate records, and making sure records are filed correctly. Key responsibilities will be:

- Ensure Safe and effective operation and appropriate maintenance of the Laboratory Management System & NATA accreditation.
- Maintain a suitable laboratory facility and carry out NATA accredited customer testing.
- Conduct maintenance to ensure equipment compliance and preventative maintenance schedules are in place.
- Assist in delivering the business objectives as set out in the budget.

### **What you will bring**

This full-time position will suit someone who:

- Proven work experience as a Research & Development technician or similar role in building and/or products laboratory setting.
- Understand NATA accreditation requirements and the BCA generally
- Solid knowledge in Australian standards for windows and doors and the construction industry generally.
- Technical and fluid mechanics aptitude, with a keen eye for detail.

### **Sound like you?**

Then what are you waiting for? Hit the apply button to send a covering letter addressing the selection criteria and an up-to-date resume quoting reference No. KE 0308 or call David Esler on 0420 905 580 for a confidential discussion.
