

October 2025

Drive quality and innovation in window and door testing, ensuring top standards and supporting growth in a leading building products company.

Lab QA Engineer

- Well established International Sealing and Hardware Supplier
- An industry-leading supplier of hardware and seals for the door and window sector
- Each brand holds a distinguished position as a leader within its specific market segment

Our client...

An international market-leading company with a one-stop solution of hardware and sealing components for residential and commercial applications. Started centuries ago, their vision is to guarantee and add value in the field of windows, doors, curtain walls, sealing and hardware solutions.

What they Offer

Being a forward-thinking company that thrives on seeing their people develop and believing that effort should always be rewarded, they are offering the right person with drive and enthusiasm the following:

- Competitive base salary plus Superannuation
- Tools of Trade
- Strong career progression

Your Responsibilities

Based in Chipping Norton, this role primarily involves managing the Test Laboratory and Quality System to ensure compliance with NATA and ISO9001, while supporting product quality, testing services, and continuous improvement to help achieve the company's operational and quality objectives. Your key responsibilities will be to:

- Manage the operation, maintenance, and compliance of the Company's Test Laboratory, ensuring adherence to NATA accreditation and ISO9001 certification standards.
- Conduct accredited product testing to AS2047 using AS4420.1 methods, maintain laboratory facilities, and expand testing capabilities where appropriate.
- Support quality assurance through audits, inspections, document control, and continuous improvement of QA systems and procedures.
- Liaise with internal teams, suppliers, and customers to resolve quality issues, process complaints, and deliver accurate, accredited test reports.

What you will bring

This full-time position will suit someone who has the following attributes:

- Experience in lab operations, quality assurance, or a technical testing environment.
- Understanding of NATA, ISO9001, and relevant testing standards (AS2047/AS4420.1 preferred).
- Strong attention to detail with good documentation and problem-solving skills.
- Confident communicator who works well independently and with cross-functional teams.
